EXPERIENCE

Collective Idea, Holland, MI – Software Engineer

FEBRUARY 2015 – PRESENT

- Work closely with clients on their projects, solving their problem with well thought out technical solutions.
- Consistently deliver high-quality code and documentation to the client.
- Facilitate weekly one-on-one's: set goals, provide accountability, create calm and trusting environment for productive conversation.
- Integrator for the Internship Program: mentor interns, encourage and coach employees on mentoring interns, ensure program is meeting goals, and setting and running weekly meetings.

SpinDance, Holland, MI – Software Consultant

AUGUST 2014 – JANUARY 2015

- Implemented a development process for dev teams, including code reviews and style guides.
- Developed and implemented a deployment process with DevOps and our client for quick and consistent deploys while maintaining the highest level of communication.
- Advised and documented best practices for other project leads.
- Mentored client's developers on their tasks.
- Added features and fixed bugs in an evolving server API.
- Managed a complex project and prioritized features, security issues, and bugs.
- Worked with Nest partner integration.

Cerner Corporation, Kansas City, MO – Software Engineer

JULY 2013 – JULY 2014

- Contractor for Cerner Corporation (through December 2013).
- Provided knowledge and expertise to better meet goals and release dates of the project.
- Implemented multiple aspects of an evolving healthcare portal.
- Synchronized external services API into Ruby objects for use in the application.
- Worked within Agile Software: two-week iterations, attended daily scrum, and planning meetings.

Davenport University, Grand Rapids, MI – Web Developer

JANUARY 2012 – JULY 2013

- Created, designed, and implemented fully functional and versatile web applications both as a team and individually.
- Managed and support current and legacy applications as needed.
- Provided GREAT Customer Service through ticketing system and project correspondences.
